## **Care instructions**

All enamelled steel cookware can only be washed by hand.

Steel wool or abrasive sponges should be used gently, otherwise they can damage the surface.

The base of a cookware is slightly concave when cold, but expands to flatten out when heated. Because of this, you should always leave the cookware to cool off before cleaning it. This allows the base to resume its shape and helps to prevent it from becoming uneven with use. It is also important that you never let the cookware boil dry, because the base then becomes skew.

Enamelled steel cookware is suitable for use in all kinds of hobs and oven safe.
