

# SYMFONISK

## Release the sound of your home

Sound has the ability to change the atmosphere at home dramatically. So, turning a grey day into a great day is only a touch of a button away.

**SONOS**

Sound is a powerful mood booster, much in the same way as light. Both are crucial for creating the right atmosphere at home and both are deeply personal – each of us has our own unique preferences in terms of volume, brightness, type, and genre. Like light, sound is culturally and socially important; it brings people together. With this in mind, it was a natural move for IKEA to also turn the attention to sound.

### Why WiFi?

Want to fill your whole home with music? WiFi is your best solution. It streams music from your network instead of your phone or tablet. So you never miss a beat. You can stream music, podcasts and radio via WiFi without interruptions from phone

calls or notifications. The music keeps playing even when your phone or tablet is not around.

### Speakers to create atmosphere at home, in every room.

The SYMFONISK speakers are a collaboration between IKEA and Sonos, so it easily integrates with other products from Sonos.

You can stream music, podcasts and radio via WiFi without interruptions from phone calls or notifications. The

music keeps playing even when your phone or tablet is not around. You can control each speaker individually, so you can play music in one room while the children are listening to an audiobook in another one, or play the same sound throughout the home.

## Creating a stereo pair

You can group two identical SYMFONISK speakers in the same room to create a wider stereo

experience. In this configuration, one speaker serves as the left channel and the other serves as the right channel.

For the best stereo sound experience, we recommend placing the two SYMFONISK speakers roughly 2.5 to 3 m (8 to 10 feet) apart.

## Home theatre system

You can easily pair two speakers, such as two SYMFONISK table lamp speakers, with a Sonos home theatre product to function as left and right surround channels in your Sonos surround sound experience. Make

sure the speakers you want to add are the same - you cannot combine a SYMFONISK table lamp and a SYMFONISK bookshelf speaker to function as surround speakers.

To choose your Sonos home theatre product, visit the Sonos website.

## Why sound?

When you come home and put on music it's like flipping a light switch, your place goes from static to warm and homey in an instant. In a recent IKEA Life at Home Report, where 22 000 people across the world were interviewed, nearly 60% said that they play music to get a homey feeling.

The same survey shows that young people often use music to make their bedrooms their personal safe havens – a home within the home.

And it's not only music that has this great ability to turn a grey day into a great one – sound overall has a profound effect on the atmosphere and on our senses.

By acknowledging this, and by adding our home furnishing expertise to the mix, IKEA can make a real difference to everyday life at home.

### Sound by Sonos

"Sound is a powerful partner in creating a sense of home. Like the soundtrack of your favorite movie, it creates an atmosphere that lets life take center stage."

## Tune your room with Trueplay™

Every room is different. With Trueplay tuning, you can put your Sonos speakers wherever you want. Trueplay analyzes room size, layout, décor, speaker placement, and any other acoustic factors that can impact sound quality. Then it literally adjusts how each woofer and tweeter produces sound in that room (works on mobile devices running iOS 8 or later)\*.

\*iPhone, iPad or iPod Touch is needed to setup Trueplay

## Sound remote

Put on the right tune for all occasions – from the kitchen, bedroom or wherever you are at home. With the SYMFONISK sound remote, you control SYMFONISK speaker and other Sonos speakers from the entire home. Adjust and control one speaker, or a group of speakers, from anywhere in your home. The sound remote talks to your speakers via the TRÅDFRI gateway, the heart of your smart home.

The Works with Sonos badge certifies products that seamlessly connect with the Sonos Home Sound System.

**SONOS**

Download the Sonos app to set up your SYMFONISK speakers and start streaming music from all devices – smartphones, tablets, and computers. When friends come over they can download the app and play DJ, too.
